EXPERIENCE

Web Developer
Freelancer - Remote
April 2024 - Present

Currently developing a portfolio website for a client, the Biotech Universe Group (BUG), using JavaScript (React) for implementation and MongoDB for database management

Web Developer
Student - Remote
May 2023 - July 2023

Created my own portfolio website using JavaScript (React and NodeJS) for implementation and MongoDB for database management. In addition to this, I have created and worked on a few other software development projects including mobile and web applications. All my projects are published to my GitHub profile.
